

Ifugao **THE MINERAL PROFILE**

Region: Cordillera Administrative Region (CAR)
Province: Ifugao
Municipality: 11
Barangays: 175
Population (as of 31 August 2015): 154,590
Income Classification: 4th Class Province
Major economic activities: Agriculture, Mining, Tourism, Sand and Gravel

The Philippine government promotes the rational exploration, development, utilization and conservation of mineral resources guided by its commitment to responsible minerals development.

Land Area and Mineral Potential

Ifugao has a land area total of 2,517.78 sq. km. or 251,728 hectares spread over its 11 municipalities.

The biggest municipality in terms of land area is Aguineldo with 454.51 sq. km. or 18.05% of the total provincial land area while the smallest is Hingyon with 114.56 sq. km. or 4.55%.

Ifugao's topography is geophysically mountainous and characterized by complex geological features. It is notably surrounded by mountains, low-lying hills and a very small alluvial land found along the Magat River, and rolling hills in the municipality of Lista. Terrain characteristics are usually rough and rugged with v-shaped gullies, creeks, streams and u-shaped rivers.

Environmental Protection and Management

The Philippine government ensures the adequate protection of the environment, before, during mining operations and beyond the life of the mine.

Mineral Statistics

₱ 153 Million or 12.1%

Estimated Gross Regional Domestic Product (GRDP) of CAR. Mining and quarrying registered **₱2.05 Million** at 2000 constant prices. It accounted a downtrend of 2.9% of the total GRDP of the Region

Mineral Commodities

Sand & Gravel

₱12.9 Million

Estimated value of Sand & Gravel produced in Ifugao in 2017.

Extraction Fees Collected

₱ 6.5 Million Extraction Fees collected for sand and gravel by the province in CY 2017.

Extraction fee is the fee imposed by provinces for the extraction of sand and gravel materials which are directly paid in the Provincial Treasurers Office with sharing as follows:

40% Barangay; 30% Municipal; and 30% Province

Employment

26 as of 2017

Workers currently employed sand and gravel operations in the province of Ifugao.

While estimates vary, it is conservatively projected that for every basic job in the mines, about four ancillary/indirect jobs may be generated in the upstream and downstream sectors.

Location

Ifugao is located at the foot of the Cordillera Mountain Ranges. It is bounded on the west by Benguet, on the south by Nueva Vizcaya, on the east by Isabela and on the north by Mt. Province. It is generally located at 120 degrees 40'17" longitude.

Social Equity and Development

The Philippine government recognizes the rights and participation of the communities and indigenous peoples and ensures the fair and equitable sharing of benefits among the company, the government and host communities
